EveryDaylily® Red Ribs Daylily
Hemerocallis 'EveryDaylily Red Ribs'

Plant Height: 15 inches
Flower Height: 20 inches
Spread: 18 inches
Spacing: 14 inches
Sunlight: ☉ ●

Hardiness Zone: 2b

Group/Class: EveryDaylily Series

Description:

This reblooming, dwarf daylily has rich red trumpets with golden throats and defined white midribs on each petal; sturdy, strong, easy to care for, great grassy texture and form; great for containers, beds, and borders

Ornamental Features

EveryDaylily Red Ribs Daylily features bold brick red trumpet-shaped flowers with gold throats and white stripes at the ends of the stems from early summer to mid fall. The flowers are excellent for cutting. Its grassy leaves remain green in color throughout the season. The fruit is not ornamentally significant.

Landscape Attributes

EveryDaylily Red Ribs Daylily is an herbaceous perennial with a shapely form and gracefully arching foliage. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting butterflies to your yard. It has no significant negative characteristics.

EveryDaylily Red Ribs Daylily is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Groundcover

Planting & Growing

EveryDaylily Red Ribs Daylily will grow to be about 15 inches tall at maturity extending to 20 inches tall with the flowers, with a spread of 18 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 14 inches apart. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years.

This plant does best in full sun to partial shade. It is very adaptable to both dry and moist locations, and should do just fine under typical garden conditions. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.
